

Cliradex®

The Essential, All Natural & Effective Way
To Clean Lashes, Eyelids & Face

Instructions for Use

- Begin with a clean face.
- Wash hands prior to opening the packette.
- Tear the notch in the packette to reveal the moist towelette.
- Unfold the towelette completely.
- Close the eye tightly, without squinting.
- Apply Cliradex® to the eyelid and surrounding facial area by starting at the inner most part of the eyelid and gently wipe to the outer area of the eyelid and face. Do not scrub, simply wipe or dab the towlette to apply the solution.
- Avoid too much pressure.
- Keep the eye closed for one minute to allow for air-drying.
- Do not wash off the dried formulation.
- Flip the towelette over, and repeat for the other eye.
- If Cliradex® gets in the eye, rinse the eye with water or saline solution.

Patients may experience a cool, refreshing, menthol feeling. This is normal and should dissipate within a few minutes. If it does not dissipate within a few minutes or if an allergic reaction occurs, the patient should consult his or her doctor.
